Profile

I am a Python developer with over 7 years of professional experience, passionate about everything Python — from data visualization all the way through to web development.

Throughout my career I have had the opportunity to work on a wide range of projects and collaborate with international teams.

My primary expertise lies in developing web applications with frameworks like Django and FastAPI, though I also have notable experience in frontend development and DevOps.

Work History

07/2025 – Present
Gdańsk, Poland

Datacapt

Python Developer

- Optimised database queries and Python code across a clinical study monitoring platform, significantly reducing response times for medical professionals and trial subjects worldwide
- Introduced a Redis caching layer that improved platform performance by up to 60%, reducing latency for end users accessing real-time clinical data
- Authored technical documentation covering both existing features and proposed system changes, improving knowledge transfer across the development team

08/2024 – 07/2025
Wrocław, Poland

Kellton Europe

Python Developer

- Developed backend for a mobile app, focused on geolocation using Django.
- Designed, implemented, and maintained spatial databases using PostgreSQL/PostGIS, enabling efficient storage and querying of large geospatial datasets
- Was responsible for designing the project architecture

06/2023 – 11/2024
Gdańsk, Poland

Code:me

Python Trainer

- Running Python bootcamps, as well as individual consultations with students

01/2019 – 08/2024
Gdynia, Poland

Profil Software

Python Developer

- Delivered backend systems for international clients across renewable energy and productivity tech, including a solar plant maintenance platform and an AI-powered meeting notes application
- Designed and maintained scalable microservice architectures using Django, FastAPI and Celery, integrating third-party services such as IBM Watson and Twilio
- Built and maintained CI/CD pipelines using CircleCI and GitLab CI, and authored Docker images to standardise deployment across environments
- Recruited, onboarded and mentored junior developers and interns, supporting their growth into independent contributors

PROJECTS

Soop

(Django, DRF, FastAPI, Celery, AWS DynamoDB, Docker, PostgreSQL)

A digital platform that helps solar plant owners and managers simplify maintenance planning, manage repairs efficiently, and monitor plant performance.

Vegas2Go

(Django, Django Rest Framework, Docker, PostGIS)

Mobile app for tourists in Las Vegas, allowing them to find the best restaurants, events and offers tailored to their interest, based on their current location.

Datacapt

(Django, Django Rest Framework, Docker, Kubernetes, Celery, Redis)

eClinical Platform for monitoring clinical studies, aimed both at medical professionals and subjects around the world.

Jog.ai

(Django, Celery, IBM Watson, Twilio, AWS SQS, FastAPI)

A real-time note-taking app that allows users to quickly capture and organize notes during calls and conferences, with easy formatting, search, and seamless integration with meeting platforms.

AI Provisioner

(FastAPI, Apache Airflow, Kubernetes, Flask)

A platform that allows provisioning, monitoring and management of tailored cloud resources for new AI projects. Supports multiple cloud providers, as well as your own custom solutions.

SKILLS

Programming Languages

Python

Databases

PostgreSQL, MongoDB, PostGIS, SQLAlchemy
(async)

DevOps

GitHub Actions, CircleCI, Terraform, Helm

Cloud

AWS, Azure, GCP

Web Frameworks

Django, FastAPI, Django Rest Framework, Flask

Containerization

Podman, Docker, Kubernetes

Testing, Code Quality

Playwright, pytest, ruff, uv

Other

Redis, Celery, Git, Asyncio, RabbitMQ, Apache
Airflow

EDUCATION

10/2015 – 06/2018

Gdańsk, Poland

Automatics and control science

Gdańsk University of Technology
